

**1st EDINBURGH HAEMATOPATHOLOGY TUTORIAL:
“INTEGRATING TECHNOLOGICAL ADVANCES INTO DIAGNOSTIC
PRACTICE”**

JUNE 7-8, 2012

at

The Roxburghe Hotel, Edinburgh

offered by the

The University of Edinburgh & NHS Lothian University Hospitals Trust

Course Directors

John Goodlad, MD, FRCPath
Consultant Pathologist
Honorary Senior Lecturer

Thomas Brenn, MD, PhD, FRCPath
Consultant Dermatopathologist
Honorary Senior Lecturer

Invited Guest Tutors

Ahmet Dogan, MD, PhD

Professor of Pathology
Mayo Clinic
Rochester
Minnesota, USA

Andrew Wotherspoon, MBChB, FRCPath

Consultant Histopathologist
Royal Marsden NHS Foundation Trust
London
UK

Daphne de Jong, MD, PhD

The Netherlands Cancer Institute
Amsterdam
The Netherlands

Course Objectives

The Edinburgh Haematopathology Tutorial takes place annually and is designed to provide a practical approach to different topics in Haematopathology. This year's course will highlight advances in immunohistochemistry and molecular technologies, and demonstrate how they are integrated into routine diagnostic practice. Topics to be covered include reactive lymphoproliferations and 'early lymphomas', T-cell lymphomas and B-cell lymphomas, as well as Hodgkin and associated grey zone lymphomas. Our group of internationally renowned guest tutors will deliver keynote update lectures in these areas, illustrating the relevance of new antibodies and molecular tests in their diagnosis. Around 30 cases will also be presented and discussed by our tutors. H&E sections and selected immunohistochemically stained sections from these cases will be available for study prior to, and after the meeting, using virtual microscopy of digitally scanned glass slides. At the conclusion of this course participants will have enjoyed exposure to a wide range of diagnostic material, will have developed an appreciation for the clinical and pathological spectrum, and genetic features of a variety of lymphomas, and be aware of benign conditions that may resemble them. In particular, participants will have developed a confident approach to these complex diseases, including recognition of more recently defined entities. The course is suited to Pathologists with an interest in Haematopathology or lymphoma diagnosis, as well as practising Haematopathologists, and Pathologists in training. Attendance is limited to 60 participants. Credit for 15 CPD points is currently being obtained from the Royal College of Pathologists.

TUITION: £375.00 (£350 for Pathologists in training)
